

Marble Tech™

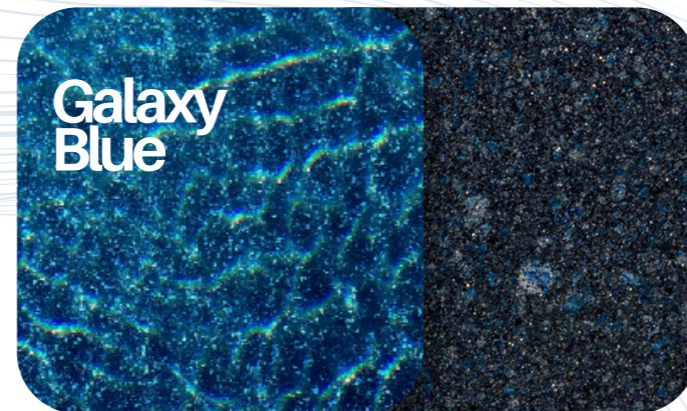

COLOURS & FINISHES

Marble Tech™ technology has revolutionized the fiberglass pool industry. It is the most luxurious and highest quality finish available on the market today, the result of years of research. An isophthalic gel finish, pigments, and high-quality resins with a marble-like appearance that is completely different from any other finish available today.

This technology, patented by Freedom Pools, creates a reflective pearlescent effect on the water. Depending on the environment in which the pool is installed, the pigments will vary, enhancing the color and creating a stunning and welcoming oasis. Stone is a natural element that is irregular in all its forms and shades, and this has also been taken into account in the finishes with Marble Tech™ technology.

Marble Tech™ FX

COLOURS & FINISHES

The Marble Tech™ FX finish has the finest drop, a detail you will notice when emptying your pool or on the upper profile of the walls while swimming.
